

RIBA APPROVED CPD SEMINAR

CORRECT DESIGN, CONSTRUCTION AND MAINTENANCE OF RAINWATER SYSTEMS

(In accordance with BS EN 12056 - 3:2000)

Book your space with your CPD co-ordinator today.

Over the last 30 years, ARP has built a reputation of working with its customers and providing design solutions – from small buildings to major construction projects.

With constant changes in legislation, climate and other factors, it is important that ARP plays its part in keeping both architects and specifiers totally informed with updates. It is with this in mind that ARP are proud to announce its new CPD Seminar.

The ARP CPD Seminar is fully accredited by the Royal Institute of British Architects (RIBA) and held at your premises, free of charge and usually at a lunchtime period with a complimentary lunch of your choice.

The presentation itself lasts for approximately 45 minutes and we leave some time at the end for open discussion on projects in hand or design issues.

Our CPD will examine the key factors which are

relevant to understanding rainwater systems and cover the following areas;

- design,
- rainwater calculations,
- construction,
- correct gutter positioning,
- maintenance,
- environmental impact of materials.

ARP is a market leading supplier of metal rainwater and roofline products to the UK market, working with hundreds of customers on projects from enquiry stage to delivery.

A family owned company, ARP has invested significantly in plant and resource so that we have the best in manufacturing processes and supply operation – delivered from our 30,000 sq ft operation in Leicester.
