

LACEY STREET, WIDNES, CHESHIRE
LINDAB BUILDING PRODUCTS LIMITED

Properties at Kingsway, Widnes

Denovo Design provided Halton Housing Trust with architectural services for a fully Housing and Communities Agency (HCA) compliant affordable housing scheme for a vacant brown-field site, a former car park, on Lacey Street in Widnes town centre. The overall scheme included 12 terraced houses and an additional three houses in a separate infill site nearby at Kingsway.

The challenge was to make the homes as sustainable as possible, with an array of environmental specifications, whilst also working within increasingly tight budgets. An architect from Denovo said “Mild steel rainwater goods were specified because they need no maintenance, are more durable, much stronger in resisting snow loading than plastic, have the lowest carbon footprint and are 100 percent recyclable.”

Lindab supplied Rainline steel rainwater system in a plain galvanized finish for the project. The dwellings achieved the Code for Sustainable Homes, Level 3 and 'Lifetime Homes' standards.
