## REINFORCEMENTS HAVE ARRIVED!

**Rainline Vandal reinforced roof drainage system is now available in the UK**

Part of the Lindab Rainline steel rainwater system, Vandal is a series of reinforced downpipes and outlets which have been designed for use in public areas such as school playgrounds or car-parks.

Vandal products are made of 2mm hot-dipped galvanised steel or 1.5mm stainless steel plate with integrated outlets and stainless steel brackets which provide protection against damage. The robust pipes can include stainless steel self-cleaning leaf traps to further reduce maintenance requirements. Available in 11 colours as well as plain galvanised or stainless steel, the vandal-proof products can be installed as the bottom section of each rainwater pipe stack and easily connect to a standard lightweight Rainline gutter system in a matching or contrasting finish.

Download the Rainline Vandal brochure now from [www.lindab.co.uk/rainline](http://www.lindab.co.uk/rainline)
