

HOUSING ASSOCIATION DEVELOPMENT, WESTON SUPER MARE
SAINT GOBAIN PAM

The St Gobain Cyclone steel gutter system was chosen for a new development of 35 flats for social and elderly housing in Weston super Mare.

St Gobain successfully overturned the original specification when the company was able to demonstrate the qualities of the St Gobain system to the architect and contractor. Cyclone was chosen because of its ease of installation, ready availability and having a 15 year guarantee.

The project was on behalf of the Knightstone Housing Association of Weston Super Mare and £12,000 worth of 150mm half round silver Cyclone was specified.

There are three similar developments planned for 2017 and Cyclone is strongly positioned to be specified on these too.

The contractor is Rydon Homes of Exeter.
