

Steel Rainwater Systems: the Contemporary and Sustainable Solution

Lindab have manufactured and supplied steel guttering for over 50 years. Our new RIBA approved CPD seminar examines the options for rainwater drainage systems.

Content Overview:

- Selecting the right material for a rainwater system
- Benefits and design flexibility provided by a steel rainwater system
- Basic calculations required for designing a rainwater system to British standards
- Specification decisions involved in detailing
- Identifying solutions to common issues including fitting to curved buildings, sustainable drainage systems and vandal prevention

Subject/Product Areas (CI/SfB):

- Services: Drainage > Rainwater goods, roof drainage systems
- Engineering: Disposal systems > Rainwater drainage systems

RIBA Core Curriculum areas:

- Climate: sustainable architecture
- Designing and building it: design, construction, technology and engineering

You can enquire about booking a Lindab CPD seminar by filling in this form, scanning or photographing it, and emailing it to rainline@lindab.co.uk
