

APRIL 2017

PRESS RELEASE

EXPERT ADVICE FROM MARLEY ALUTEC AT CIH HOUSING EXHIBITION & CONFERENCE

Leading manufacturer of high quality aluminium rainwater and eaves systems Marley Alutec will be offering free technical and design guidance at Housing 2017 running from 27 - 29 June at Manchester Central on stand G42.

Representing Europe's largest housing event with more than 200 speakers, 400 suppliers and 8,000 trade attendees, Housing 2017 is the perfect place to come and get expert advice from the UK's leading housing experts.

Marley Alutec has a wealth of experience in helping local authorities and housing associations build and maintain properties that meet the demands of 21st century housing including performance, durability, sustainability and aesthetics.

.../2...

On its stand, Marley Alutec's team of technical experts will be on hand to offer advice on best practice to visitors as well as problem solve any current project challenges. Recently the company has assisted Sheffield City Council in Europe's largest re-roofing project with bespoke designs as well as a number of housing associations on flagship developments as a result of meeting key requirements such as low life cycle costs, ease of installation, sustainability credentials and virtually zero maintenance needs.

Marley Alutec has an extensive portfolio of highly sustainable and innovative products, all of which provide life expectancies of 50 years or more. In addition, the company offers one of the largest BIM object libraries in the sector and offers a full technical service, from the development of initial designs, to the delivery of detailed estimates and on-site assistance.

Also on display on the company's stand will be a range of its high quality aluminium products including its increasingly popular Evoke range of fascia, soffit and coping, which can withstand hurricane force winds, its perfect cast-iron replica Tudor downpipe range and its modern Aligator Boxer Gutter profile to name but a few.
