

### Continuing Professional Development

Aimed at the construction industry and approved by the Royal Institute of British Architects (RIBA). Alutec's Continuing Professional Development (CPD) course is designed to improve the understanding of the qualities of aluminium as a material and advise on the application of eaves gutter, downpipe and soffit & fascia systems. The course aims to provide an unbiased overview to allow informed specification.

### Course content

- Aluminium & the environment
- Properties of aluminium
- Cost considerations
- Design consideration
- Alutec rainwater & eaves systems
- Alutec Technical Support
- The value of a guarantee

### Format and registration

More than 2,000 delegates over six years have attended the course, which is held at delegates' premises and consists of an hour presentation with the appropriate support materials and samples. As most seminars take place during the lunch period, Alutec are happy to offer a complimentary buffet, during which there is the opportunity to address any further queries.

If you would like to arrange a seminar call: 01234 359438 or email: [cpd@marleyalutec.co.uk](mailto:cpd@marleyalutec.co.uk)
