

**JANUARY 2017**

## **PRESS RELEASE**

### **NEW YEAR, NEW APPOINTMENT AS MARLEY ALUTEC GROWS AGAIN**

Marley Alutec is delighted to announce the appointment of Drummond McKenzie as its first dedicated sales manager for Scotland, in a move that underlines the company's commitment to the country.

Adding a new sales manager reaffirms Marley Alutec's dedication to continued growth in 2017. Over the last 12 months the company has launched its most durable coping range, unveiled a newly updated website that includes access to industry-leading BIM files and supplied products for the UK's largest roofing project in Sheffield, along with bespoke technical guidance.

"In the last year we've achieved some incredible things and we're keen to carry this momentum forward into 2017. Marley Alutec is constantly looking to expand its operations and bringing Drummond McKenzie on-board is testament to that," commented Nick Glover, Head of Sales and Marketing at Marley Alutec.

.../2...

Drummond McKenzie will bring with him an arsenal of skills and valuable experience that he has garnered from nearly a decade of work within the industry. Experienced within a sales environment, Drummond has previously worked as an Area Sales Manager for a roofing contractor and, more recently, he worked as a Business Development Manager at a rainwater system manufacturer.

In his new role Drummond will oversee the achievement of Marley Alutec's sales objectives in Scotland by developing sales through specification, networking with local contractors and growing positive relationships with both national and independent merchants. Drummond will also work closely with the Marley Plumbing and Drainage team in Scotland.

Speaking on his appointment, Drummond commented, "I'm delighted to have the chance to work for Marley Alutec and I'm very excited to get started in my new role. I believe I bring with me a range of qualities that will help the company continue with its upward trajectory. I look forward to working closely with Scottish builder's merchants, contractors as well as my colleagues at Marley Plumbing and Drainage."
