

Anthracite Grey Rainline

You Asked, Lindab Listened!

Many factors influence guttering colour choice, often an architect will specify to match another building component. Anthracite Grey has become increasingly popular as a window frame colour and predictably, Lindab have received an increased level of enquiries for a steel rainwater system to match.

Lindab Rainline is available in **13 colours and finishes** which reflect global trends and satisfy a broad range of design aesthetics. Silver Metallic, Anthracite Metallic and Dark Grey options from the Rainline range complement Anthracite Grey components and many projects have used these colour combinations successfully.

Lindab have listened to your requests and have now added the highly desired **Anthracite Grey- RAL 7016** shade to the range of painted rainwater systems. All painted Rainline systems benefit from a UV-stable, colourfast high-build polyester coating and carry a **15-year warranty**.

Anthracite Grey colour swatches and sample stop ends are available on request.
