GUTTERCREST GROUP WELCOMES NEW DIRECTOR OF OPERATIONS

The Guttercrest Group recently announced the appointment of Geraint Jones as its new director of operations. Geraint will lead the development of the group's Shropshire team to build on their continued success.

Geraint brings a wealth of experience from the aluminium rainwater products industry after serving as managing director of Rainclear Systems for four years and prior to that, held several roles at Alumasc Rainwater. He also retains his role as chairman of the Metal Gutter Manufacturers Association.

"I am delighted to join the Guttercrest team. Guaranteeing quality products and ensuring customer service is a key priority," says Geraint.

Geraint is determined to bring synergy across all operations teams at the rapidly expanding firm. He looks forward to implementing and monitoring new processes and streamlining resources to meet operational objectives.

“Geraint brings with him a wealth of practical product experience and management skills from the industry; we are excited to have him on board. He is joining the business at a crucial time of expansion and his experience is invaluable to Guttercrest,” says Gary Power, managing director.

The Guttercrest Group, based in Oswestry, Shropshire is a state-of-the-art manufacturing centre for aluminium building products, including: guttering, downpipes, hoppers, fascias and soffits under the Guttercrest brand, wall copings and cappings under the Ali-Fabs brand and rainscreen under the Husk Architectural brand.
